

DISCLAIMER These maps represent the best available data prepared by qualified technicians under the supervision of a Professional Engineer. However, it is an interim measure not intended to replace more detailed flood inundation modeling and mapping products developed by the dam owner's engineer. Completing a more detailed analysis could result in changes to the information and /or results presented in this report. Due to the limitations and specific nature of this Inundation Study, this report must be utilized in its entirety and any interpretations including additional analysis based on only a part of this report may not be valid. DCR makes no warranty or guarantee nor assumes any liability for any damages due to errors, omissions, or positional accuracy in this product.
